

Question	Original Task	Note	Iteration No.1	Note
First glance				
What do I spot?	<ol style="list-style-type: none"> 1. full screenshot missing after step 1 2. 4.2. enter enter 3. 4.8. CAUTION: forgetting 4. 4.8. CAUTION: color 5. 5. (...) “procedure” 6. 4.4. (1/8/16/32/64) “/” 7. 4.4. (...) in bpp 8. Steps: redundant! 9. Purpose: (...) enables 10. (...) RDP display window parameters 11. “for later identification” > rewrite 12. (...), for example , 13. rewrite 3. TIP 		<ol style="list-style-type: none"> 1. (...) allows you to... 2. extra: X button (2. / TIP #3) 3. rephrasing in 2. / TIP #2 4. rearranged TIP s 5. indents askew (4.a,) 6. hyperlinks visible (are they functional?) 7. hyperlinks note: 4.a, “here” 4.d, “<u>here</u>” 8. additional info, example and external link in 4.1 9. additional external link in 4.d, TIP 10. 4.6. > 4.e, TIP 11. 4.8. CAUTION > 4.g, CAUTION (color?) 12. 4.9. (...) “appropriate” > 4.h, (...) preferred (OK?) 	
Reminds me of/to...	<p>check conventions, format, spelling and terminology</p> <p>check consistency</p> <p>check for redundancies</p>		<p>Check if possible:</p> <ol style="list-style-type: none"> 1. X button: does it stand for delete? 2. hyperlinking (important and easy in Flare but how to do it in Notepad++?) 3. underlining hyperlinked text necessary? 4. CAUTION color unsure > MMOS 5. is “preferred” OK? > check MMOS 6. “field” and “tab” necessary or optional? (Where do I check for this?) 7. Unsure if “menu bar” / “tab” and names like that are appropriate here -----> 	<p>Where do I check for X button?</p> <p>How do I make hyperlinks work in Notepad++ or similarly simple tag editors?</p> <p>Where do I check MMOS for language?</p> <p>Where do I check q. 7?</p>
How would I correct/rewrite?	<p>bpp > bits per pixel</p> <p>procedure > steps 1 - x</p> <p>CAUTION color: yellow? or red?</p>		<ol style="list-style-type: none"> 1. X button - possibly leave it until more info available 2. CAUTION: red? 3. hyperlinked text underlined 	
Check rewrite				
OK? Yes	<p>bits per pixel: Y</p> <p>procedure: not rewritten yet (check if possible)</p> <p> CAUTION red? Y (check for convention later)</p>		Insufficient info	
OK? No			Insufficient info	
<p>Other: general “visual” of Iteration no. 1 a lot smoother than Task 2 2.0.</p> <p>Formatting and wording more concise and consistent.</p>				

What I did not spot				
Where?	1. indentations askew (all through doc) 2. to calculate the idle timeout? 3. RDP display window (4.3, 4.3, 4.4) 4. the suitable value (4.4) 5. 4.8. CAUTION: network load increase by up to 500%			
Why not?	1. formatting? (GoogleDocs) 2. probably mixed this one up with Idle timeout 3. terminology to internalize 4. terminology to internalize 5. terminology to internalize			
If dunno, then				
Where do I check?	1. Tag editor will hopefully solve it 2. Check OI admin guide / MMOS 3. OI admin guide / MMOS 4. and 5. see 3. above			
CHECK				
Other
