CHECK FOR…

CONVENTION

- Limit to number of | TIP per Step? General advice about WCN: use sparingly

- | CAUTION color - Is there ANYTHING yellow about it? Balabit convention
- WARNING CAUTION NOTE, TIP (+ important, video, mobile, etc)

- Why are - suffix, numeral, example in monospace? MONOSPACE: commands, actions & their parameters
  What else needs to be put in monospace?   + userinput, path, filename

- What needs to be put in bold?   GUI elements

- Is there anything that needs to be italicized?   atm @Balabit: "Optional step" italicized + bulleted lists,
  similar examples (for visual separation)

- Is there anything that needs to be underlined? Not for xlink or hyperlink (comes from stylesheet and tags)

- "field" and "tab": necessary, optional, or redundant? Seems inconclusive
  Observation: with GUI elements and with "Click" imperative they seem to be used less often.
-
- Convention for introducing xlink / xref / external link?
  For (further/more) details/info about (...) see …

## FACTUAL / TECHNICAL INFO

- RDP Control > Settings : What does the X button do? SPS_5.8_scb-guide-admin: no clue found yet

- How does hyperlinking work in tag editor / HTML / XML / Flare / other?   later

- Do I need to underline the hyperlinked text? Usually not, comes from style sheet

- How would I put a cross-reference to a different procedure in the Flare document?   later

- **Technical terms for items like "menu bar", "tab", "field", "panel"**
